Maximum Marks	4 Marks

### Signs with smart connectivity for Better road safety

The screenshot displays the Node-RED web interface in a browser. The main workspace shows a flow named "Flow 1" with a single node labeled "Hello Node-RED!" connected to a "msg.payload" output node. The left sidebar contains a "filter nodes" search bar and two categories of nodes: "common" (inject, debug, complete, catch, status, link in, link call, link out, comment) and "function" (function, switch). The right-hand panel shows the "info" tab for "Flow 1", displaying its ID as "803922e48a697a4e". A confirmation message at the bottom of the right panel states: "You can confirm your changes in the node edit tray with ctrl-enter or cancel them with ctrl-escape. Activate Windows. Go to PC settings to activate Windows."
